AUTHOR INDEX TO VOLUME 17

Barillot, Ph., 245

Caruso, A., 83
Cotta, R. M., 217

Kim, S.-W., 101

Lacroix, M., 25

Naraghi, M. H. N., 227

Pasquetti, R., 83
Peric, M., 63
Prieur du Plessis, J., 171, 197

Ramaswamy, Balasubramaniam, 123
Ramesh, P. S., 1

Saltiel, C., 227
Schreüder, Willem A., 171, 197
Sharma, Devraj, 171

Thiart, G. D., 43
Torrance, K. E., 1

Voller, V. R., 25, 155

SUBJECT INDEX TO VOLUME 17

Analysis of pressure-velocity coupling on nonorthogonal grids, 63
Analysis of radiative heat transfer in participating media using arbitrary nodal distribution, 227

Boiling and natural convection in porous materials, 1
Boundary element approach for transient and nonlinear thermal diffusion, 83

Efficient finite element method for two-dimensional fluid flow and heat transfer problems, 123

Fast implicit finite-difference method for the analysis of phase change problems, 155
Finite difference solutions of solidification phase change problems: transformed versus fixed grids, 25
Finite difference scheme for the numerical solution of fluid flow and heat transfer problems on nonstaggered grids, 43

Hybrid numerical/analytical approach to nonlinear diffusion problems, 217

Method for phase change problems, 155

Near-wall turbulence model and its application to fully developed turbulent channel and pipe flows, 101
Nonlinear diffusion problems, 217
Numerical algorithm for problems involving boiling and natural convection in porous materials, 1
Numerical modeling of interior boundaries, 197
Numerical modeling of atmospheric boundaries, 171
Numerical simulation of crater formation heating by laser beam, 245
Numerical solution of problems on nonstaggered grids, 43

Pressure-velocity coupling on nonorthogonal grids, 63

Radiative heat transfer in participating media, 227

Solidification phase change problems, 25
